

Camden

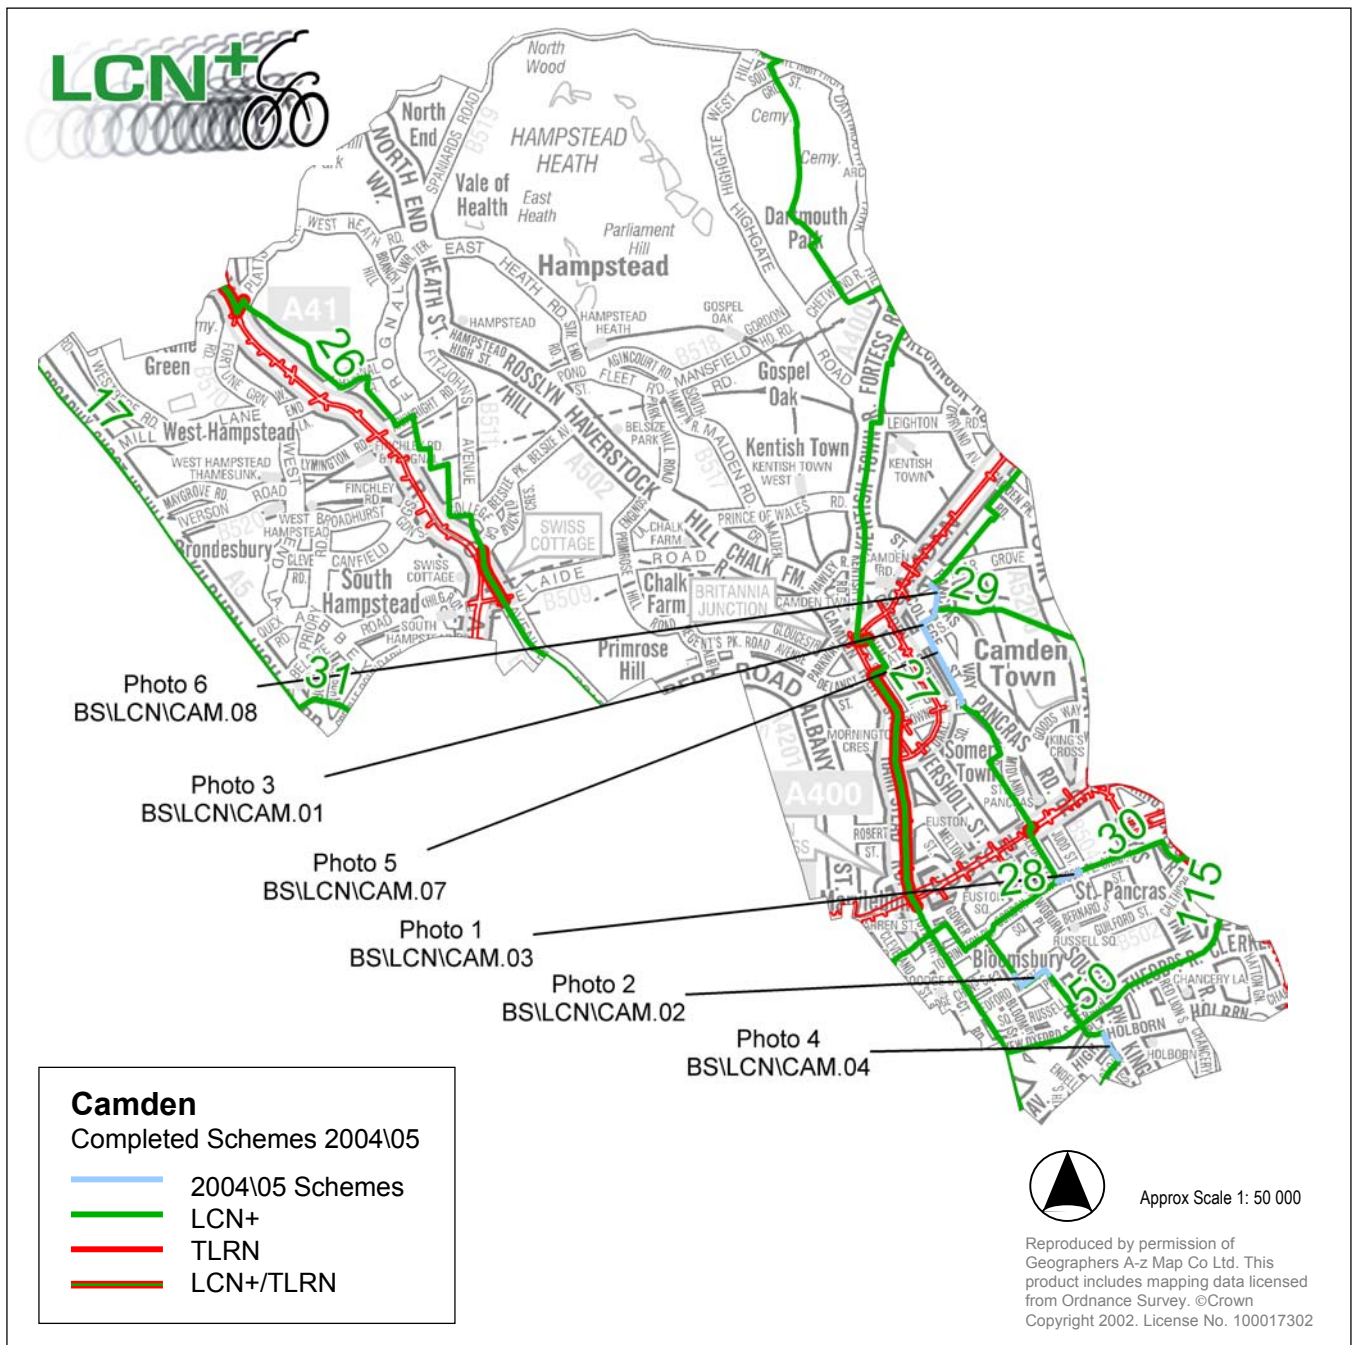

Borough Officer **Dave Stewart**

I am Principal Engineer at LB Camden and have been working here for over 18 years. Although I work on a variety of traffic schemes Camden recognises the need to accommodate all users and I am able to devote some time specifically to cycling.

We have a good relationship with the Camden Cycling Campaign, meeting their representatives quarterly, and have recently begun involving them in CRISP studies. LB Camden is committed to providing good quality cycling schemes and we were amongst the first to implement segregated cycle ways, which have been used heavily since their implementation.

The network completion in LB Camden currently stands at around 50% and we expect to have completed work on the network by 2008/09.

◀ **Scheme Photo 1**

Scheme Code: BS\LCN\CAM.03
