

Hammersmith & Fulham

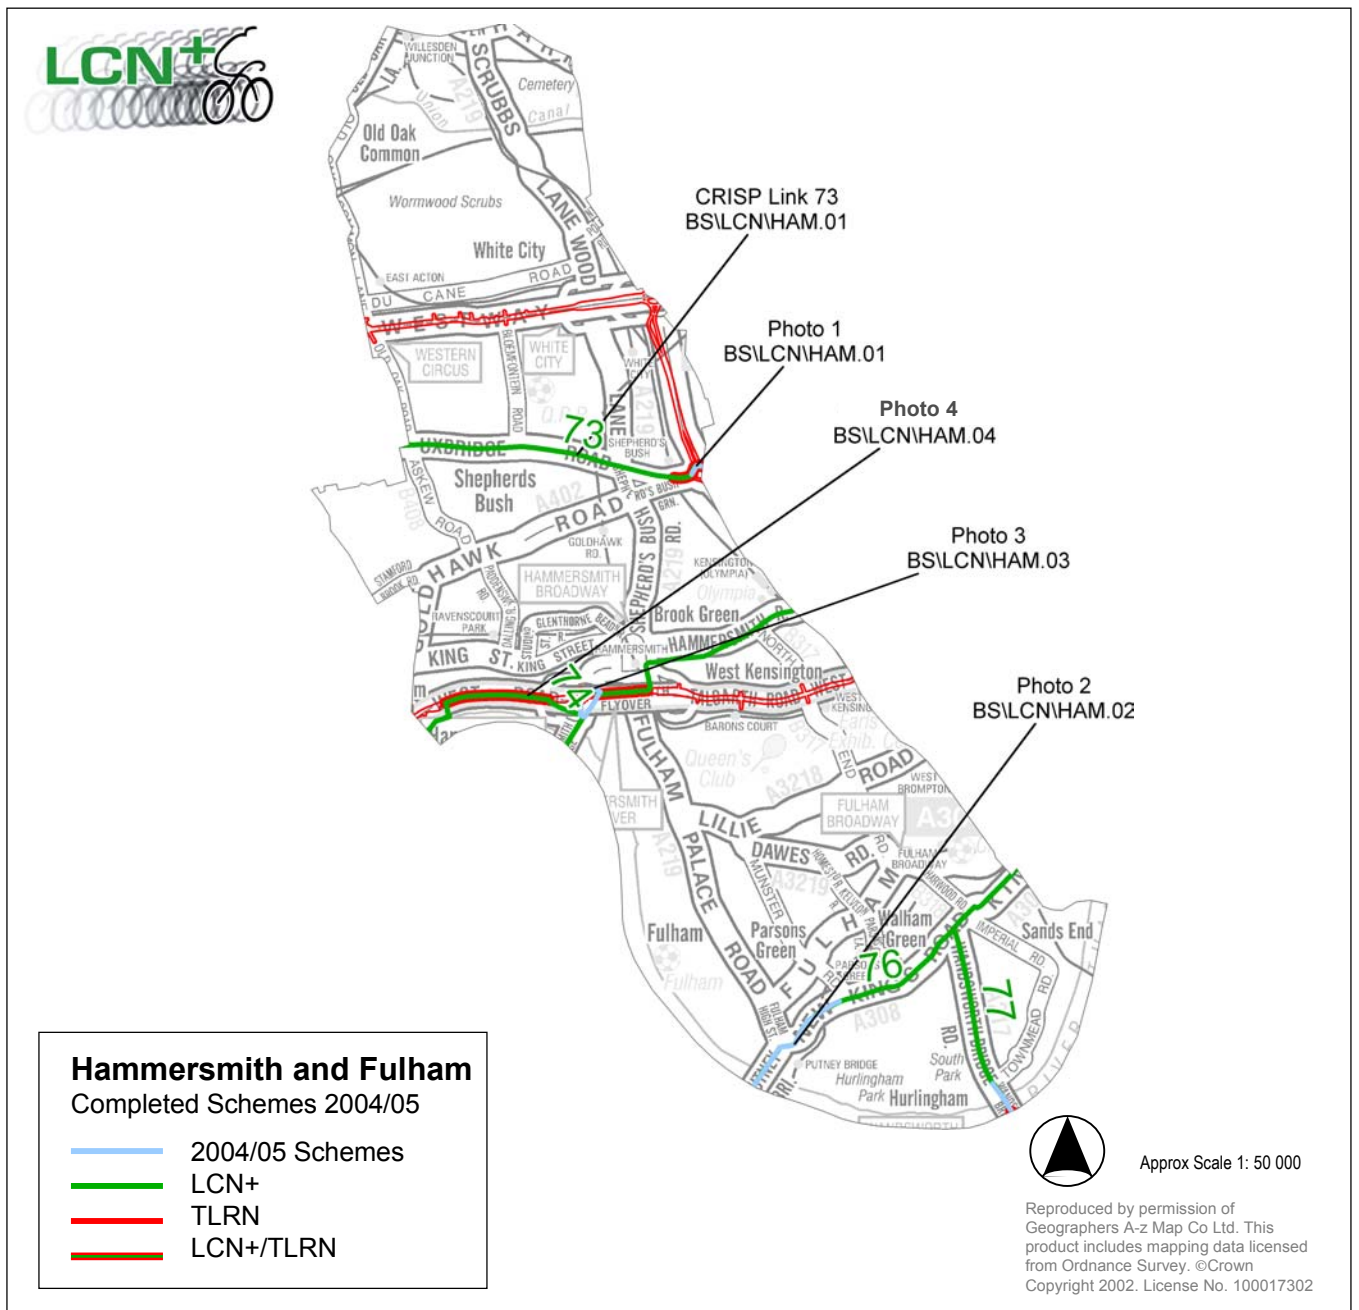

Borough Officer **Simon Franklin**

I have been working as a transportation planner at LBHF since 1987 - before that with consultants and L B Richmond. The advantage I enjoy of being in a forward planning section is that as well as having an overall responsibility for commissioning cycle schemes in the borough, I have a wider responsibility for bus priority improvements as well. This, along with active links with the community, helps with the co-ordination of planned works.

4.8% of borough residents cycled to work (compared to 2.3% in London as a whole, 3.5% in inner London, and 3.8% in LBHF in 1991)

The total number of cycle commuters in the borough was 3942 in 2001 compared to 2460 in 1991 – a 60% increase.

A Cycling Strategy was produced in February 2004 which aims to ensure that cycling can play its full part in relieving the strain on our overcrowded road and public transport networks, and contributing to promoting a sustainable and socially inclusive development of the borough

► **Scheme Photo 1**

Scheme Code: BS\LCN\HAM.01
Link Number: 73
Location: Holland Park Roundabout Uxbridge Road
Description: Shepherds Bush links across Holland Park Roundabout. Facilities to link Shepherds Bush to Holland Park (CRISP Study)
Cost: £106 570 **Length:** 0.1km
