

Tower Hamlets

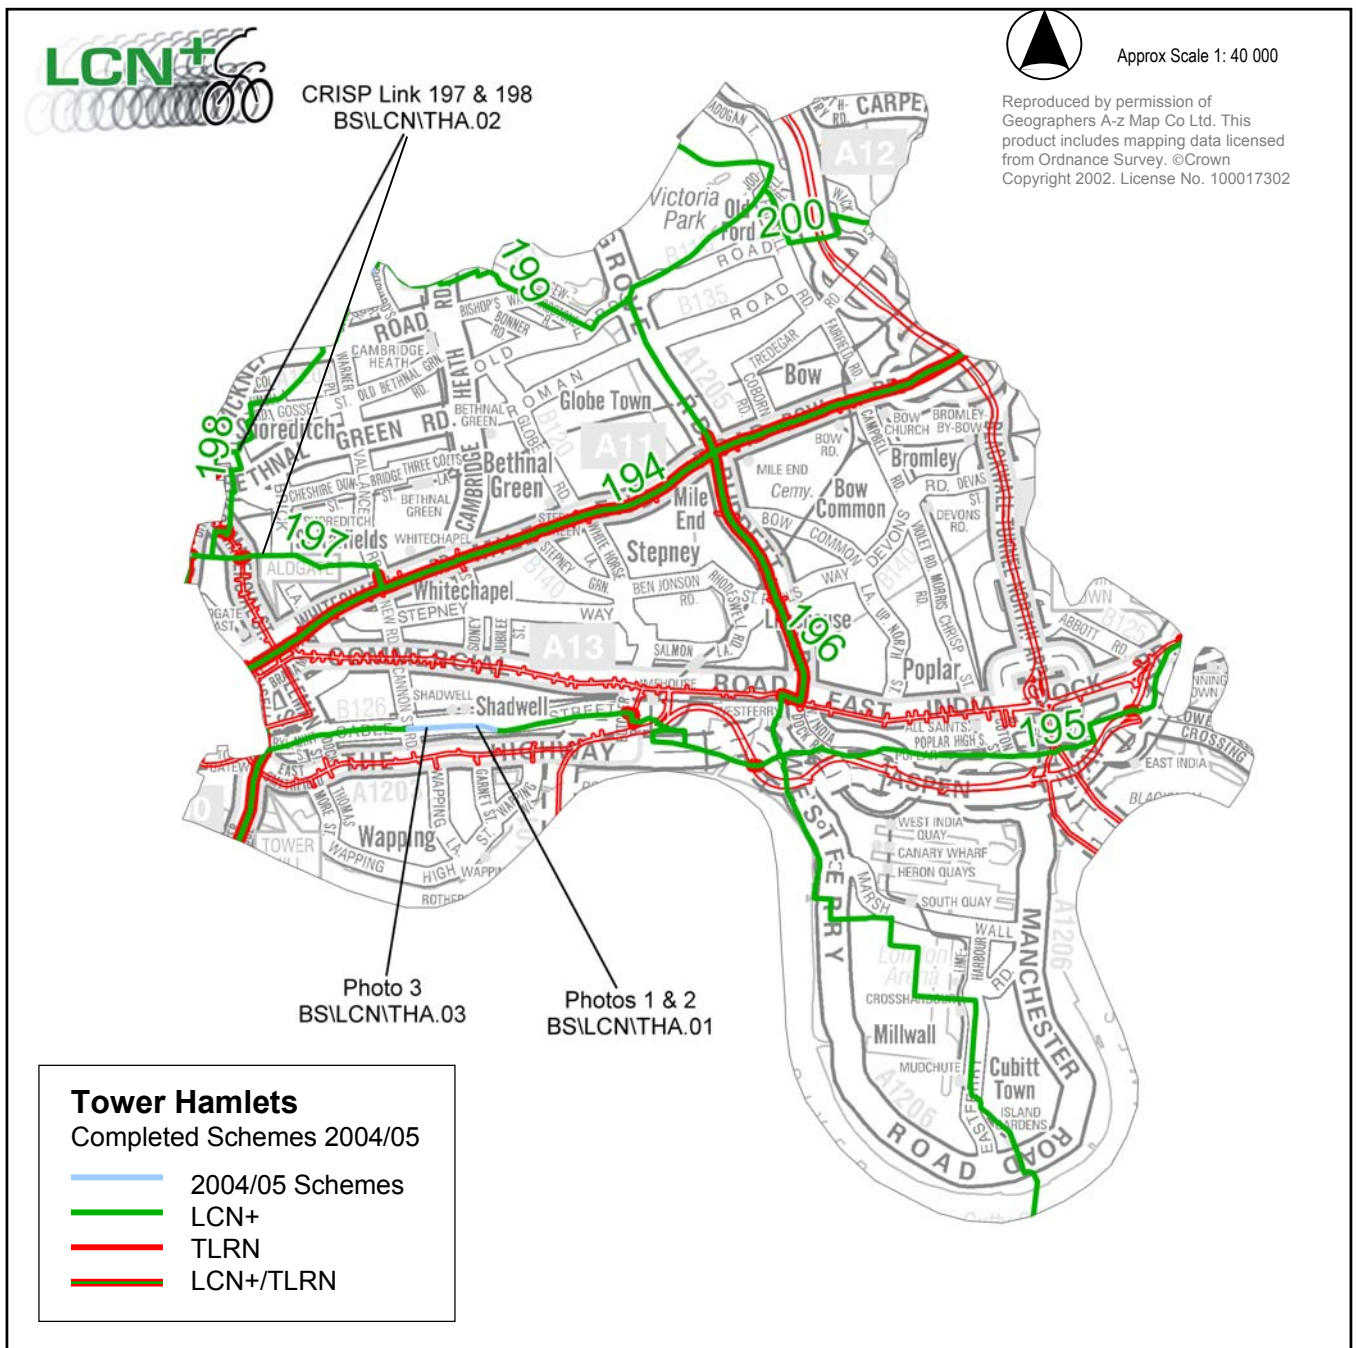

Borough Officer **Ashraf Ali**

I have worked for LB Tower Hamlets for approximately five years. My background is in civil engineering my current role being Project Manager, Sustainable Initiative.

Walking and cycling are the most acceptable modes of transport for Tower Hamlets Residents, cycling representing around 5% of all trips made around the borough. To increase this figure we involve community organisations in the consultation process for all schemes and actively promote cycling throughout the borough at various events

We have a very good working relationship with Tower Hamlets Wheelers, the local cycle campaign group and last year completed two CRISPs with significant input from the stakeholders creating well-balanced reports, which will help us to identify future necessary work on the LCN+ network. Network completion 20%.
